

Plantation

Palm Upstream

Our Palm Upstream business is the largest revenue generator and forms the core of the FGV Group. We manage a total land

bank of 413,951 hectares in Malaysia, producing 2.92 million MT of CPO annually.

[Discover More](#)

Palm Downstream

Our Palm Downstream safeguards the upstream operations by providing a guaranteed uptake of Crude Palm Oil (CPO) for palm-based downstream activities.

Renewable Energy

Our Renewable & By-products division is the backbone of the Group's Waste-to-Wealth initiative. It utilizes biomass at its palm oil mills to produce biogas fuel for national, rural grid

connections and bio-compressed natural gas (bio-CNG).

Integrated Farming

Integrated Farming leverages on the palm-based circular economy that taps into the lucrative synergies presented by the Group's extensive palm oil operations. The business components for Integrated Farming include cash crops, paddy and rice, animal nutrition and protein, livestock and dairy farming.
