

Plantation Upstream

One of the largest producers of Crude Palm Oil (CPO) in the world

Our Palm Upstream business is the largest revenue generator and forms the core of the FGV Group. FGV manages a total land bank of 413,951 hectares and 66 palm oil mills to produce approximately 2.92 million MT of CPO per year.

In Malaysia, we have 214 estates located in Selangor, Perak, Pahang, Negeri Sembilan, Johor, Terengganu, Kelantan, Sabah and Sarawak. Currently, FGV owns 66 mills across Malaysia, processing over 14.18 million MT of Fresh Fruit Bunches (FFB) annually, where two-thirds of the FFB are sourced from FELDA settlers and independent smallholders.

Our Renewable & By-products division under FGV Palm Industries Sdn. Bhd. (FGVPI) is the backbone of the Group's Waste-to-Wealth initiative. It utilises biomass (gas, solid, liquid) at its palm oil mills to produce biogas fuel for in-house uses

and grid connections.
